

**CTEC 22061 – System and Network
Laboratory
Lab 08 – Introduction to the
VirtualBox**

01)

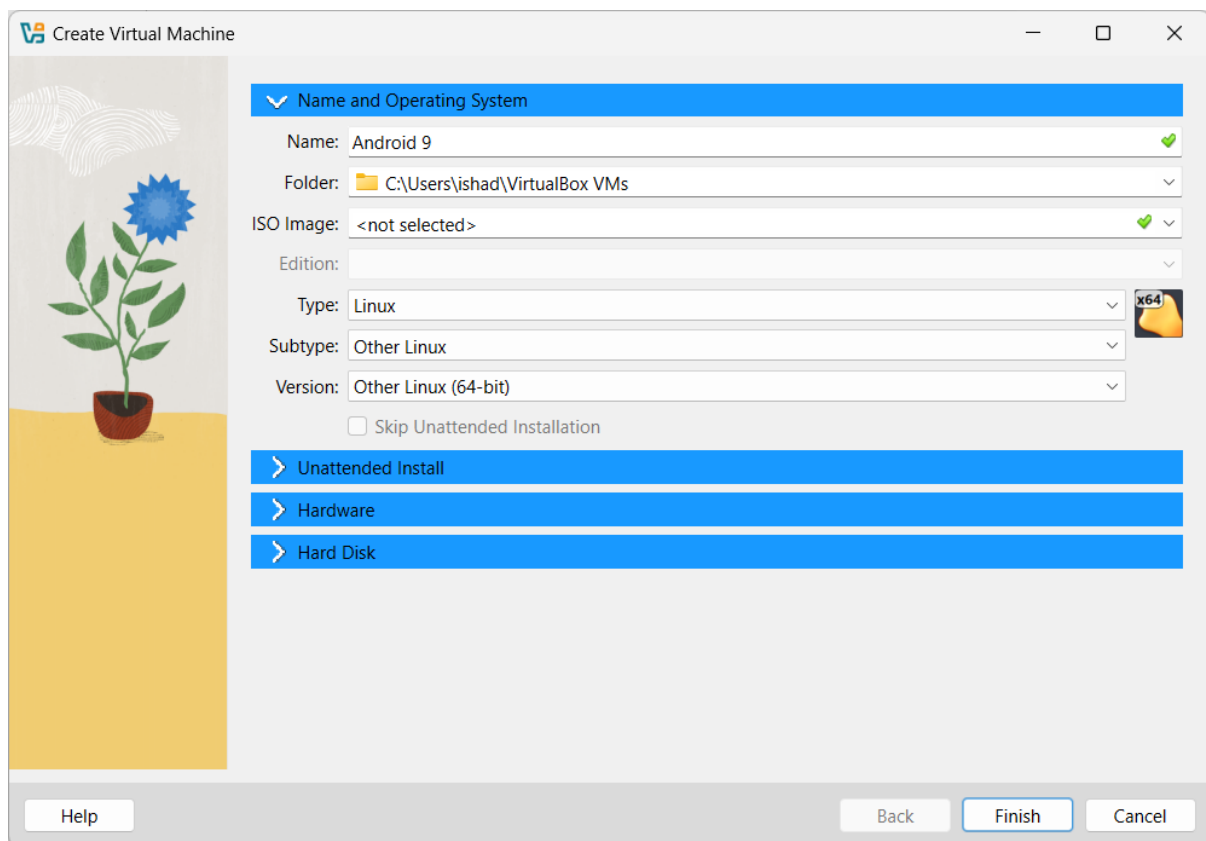

ISO Files

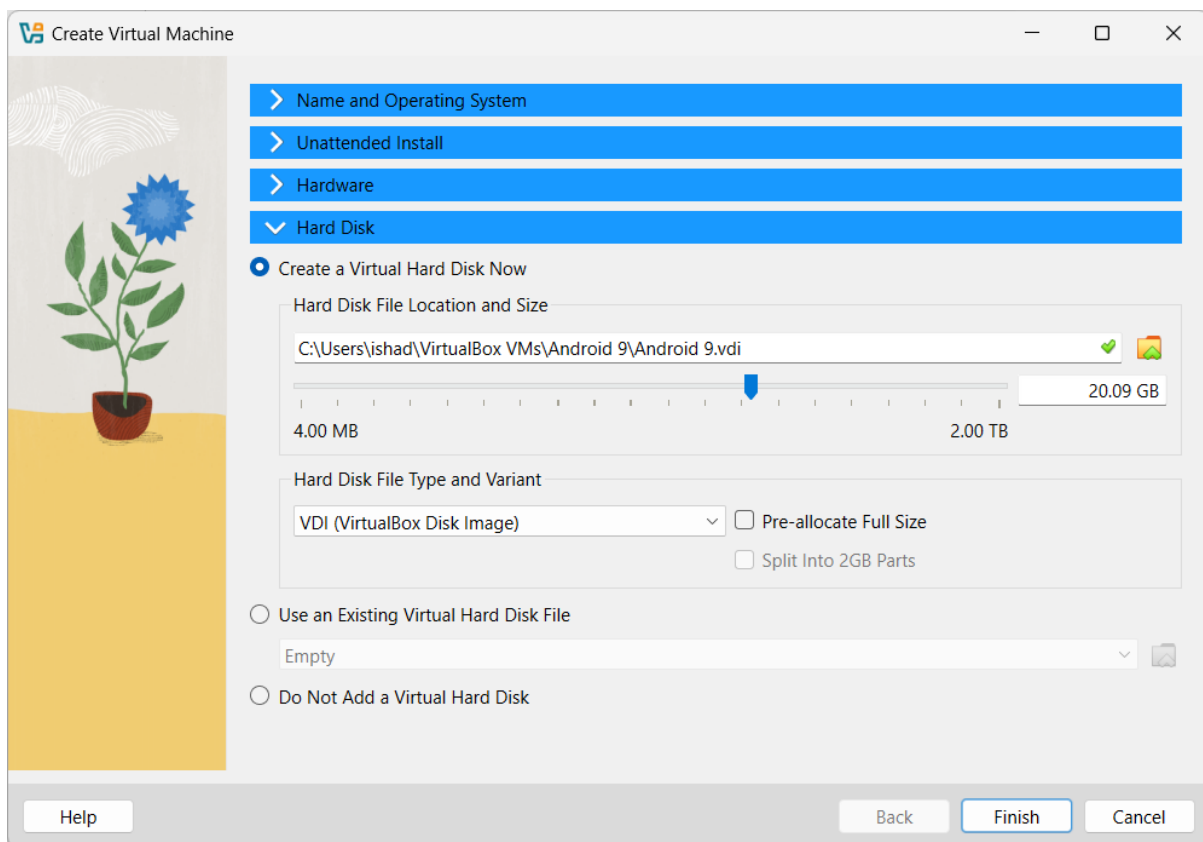

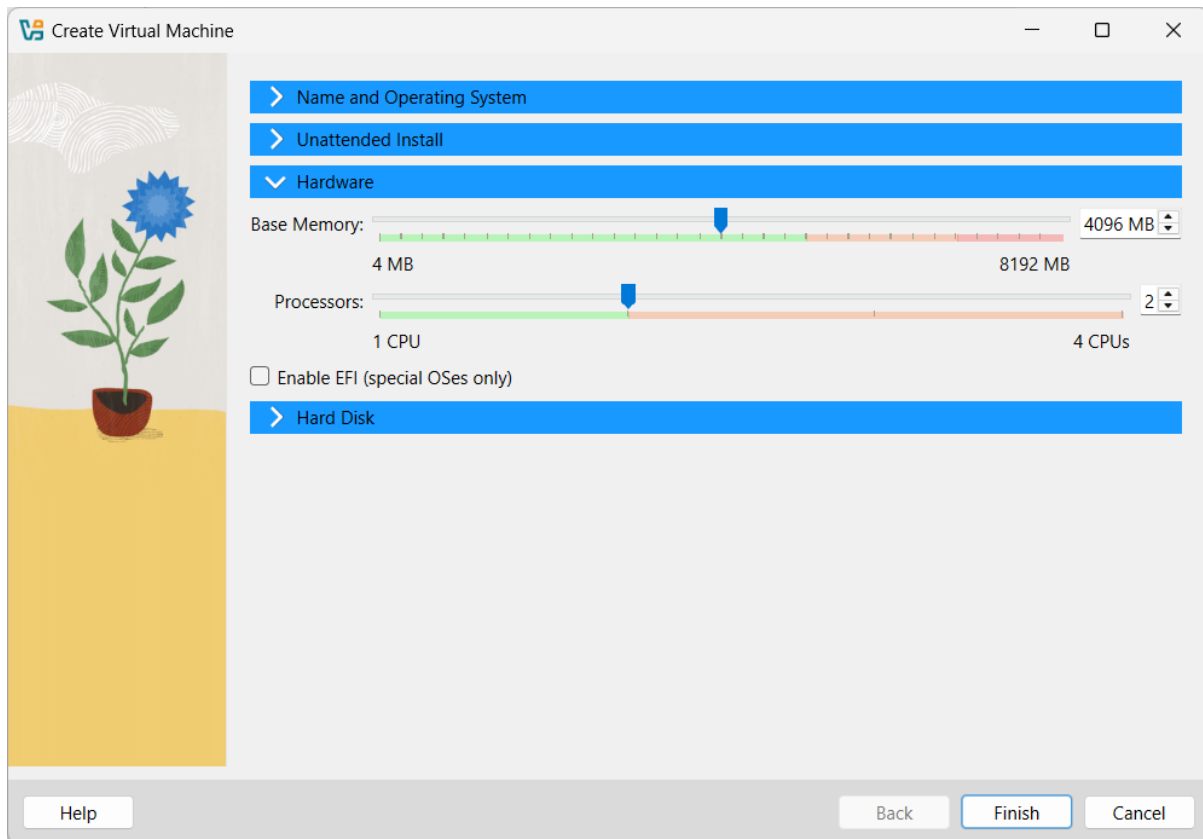

An ISO file is a read-only archive of the contents of an optical disc (CD, DVD, or Blu-ray), used primarily for creating bootable media or installing software from a virtual drive.

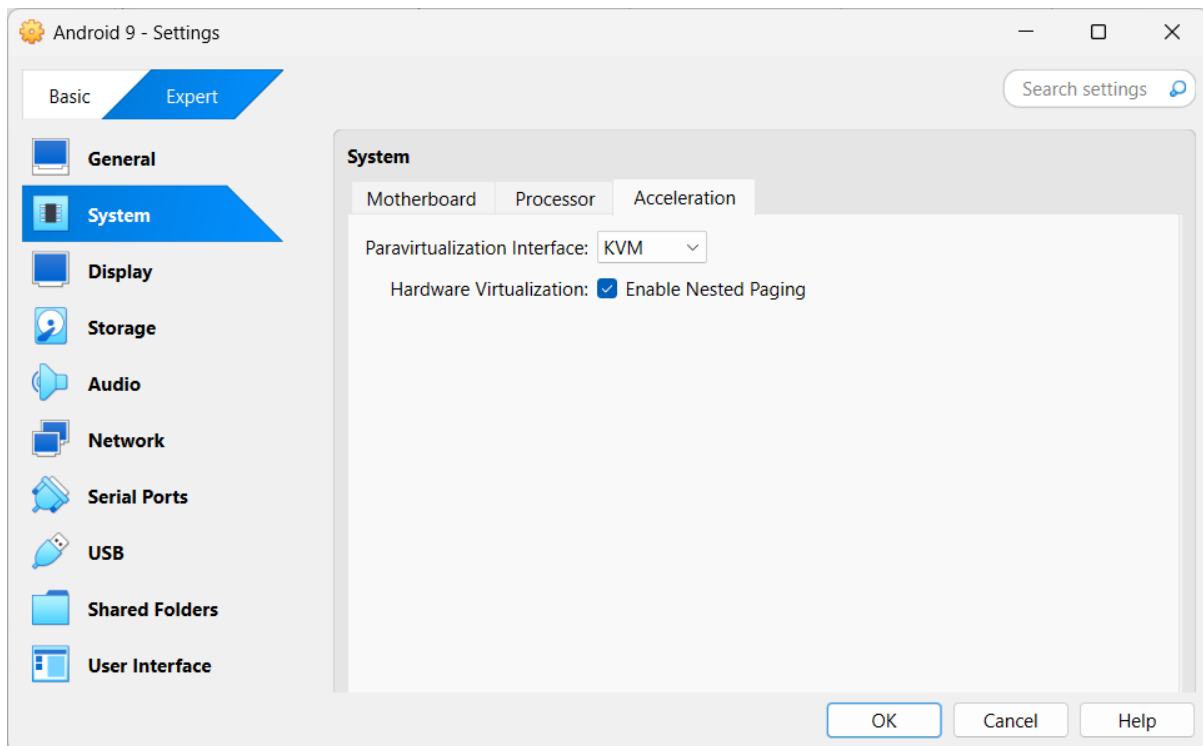

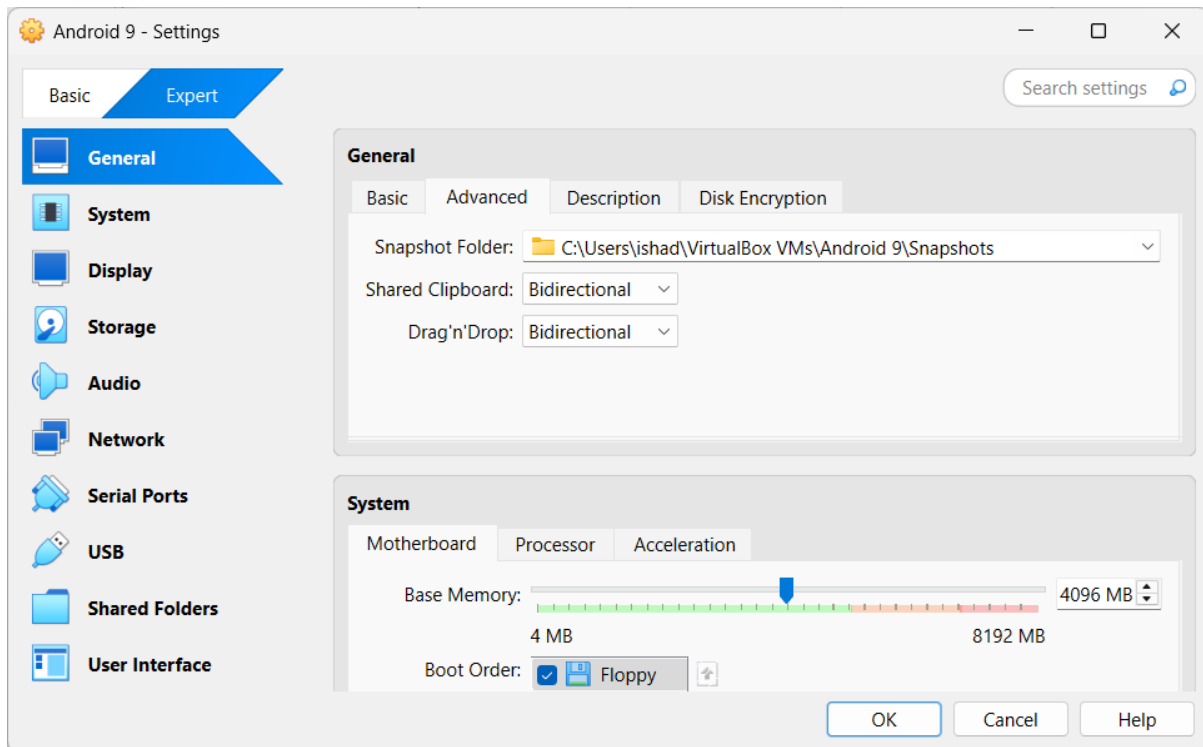

VDI Image

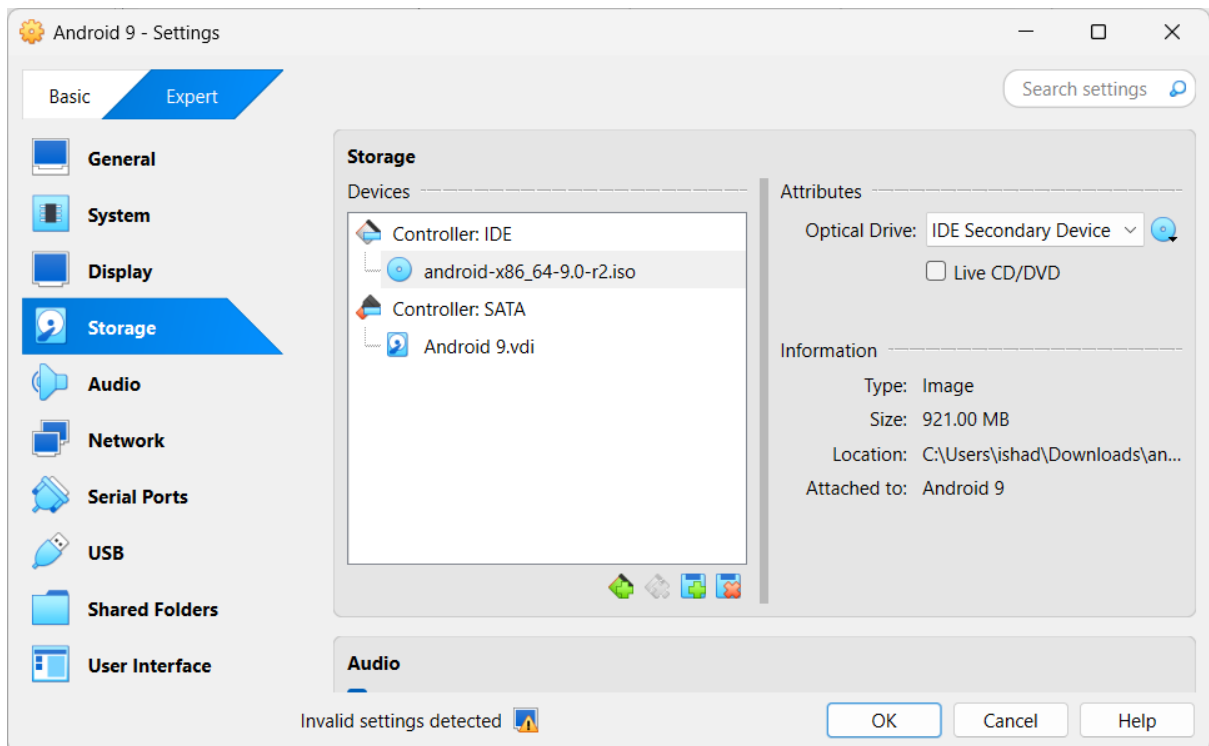

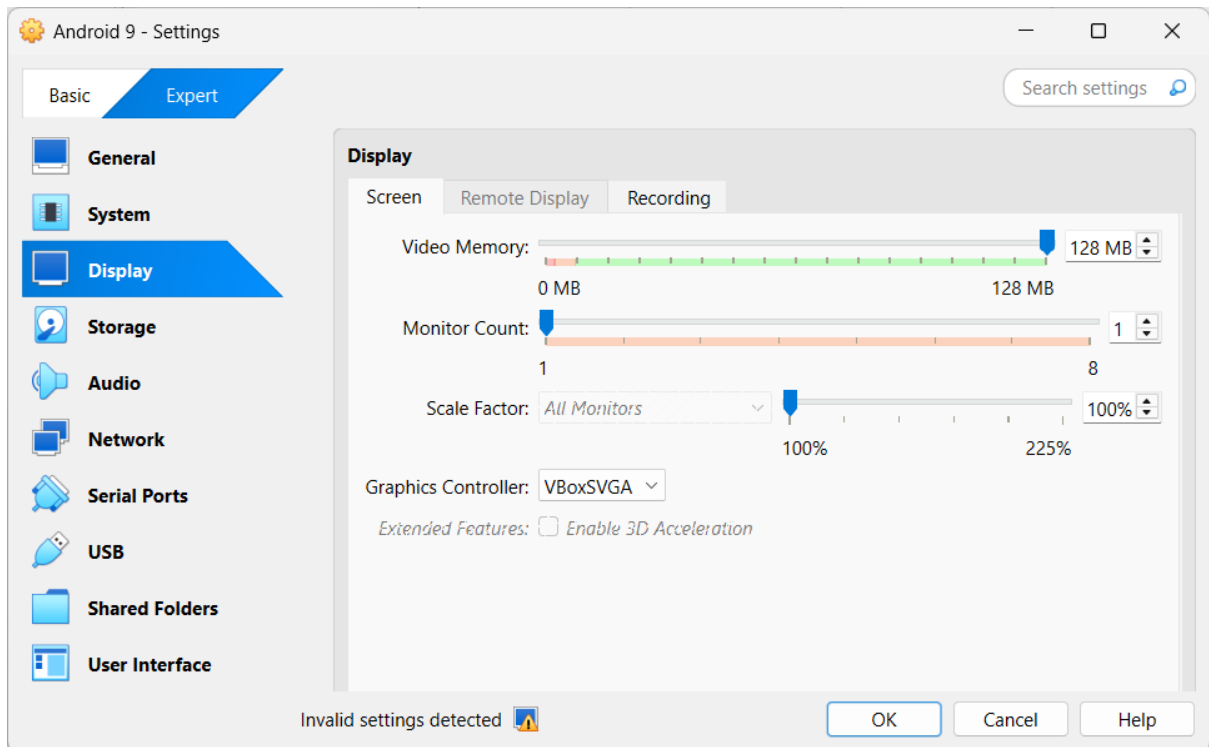

A VDI file, on the other hand, is a virtual hard disk image used by virtualization software like Oracle VirtualBox to represent a virtual hard drive within a virtual machine.
